EDUCATION

Arizona State University

B.S. in Computer Science, Minor in Data Science

Tempe, AZ

Aug. 2023 – May 2027

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL (Postgres), JavaScript, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, Node.js, Tailwind, pandas, NumPy, Matplotlib, Apache Beam, Transformers

Tools & Platforms: Git, GCP, Docker, Kubernetes, Heroku, VS Code, PyCharm, IntelliJ, Stripe API

EXPERIENCE

Software Engineering Intern

June 2025 – Present

Wimoku

Remote, USA

- Reduced pipeline costs 60% by replacing Dataflow with Pub/Sub + Cloud Functions + BigQuery.
- Built Dockerized Python service executing 200+ SQL queries daily via Kubernetes CronJobs.
- Created documentation detailing architecture, deployment strategies, and onboarding guides to accelerate new engineer ramp-up.

Freelance Web Designer

Jan. 2024 – Present

Self-Employed

Remote

- Delivered 3+ client websites with 20% faster load times and responsive design.
- Applied SEO best practices, boosting organic impressions by 30%.
- Built polished UI/UX with React, Next.js, Tailwind, and database integrations, including secure payment flows and client content management dashboards.

PROJECTS

Streaming Stock Data Pipeline | Python, Apache Beam, Dataflow, Pub/Sub, BigQuery

2025

- Engineered real-time ingestion of OHLCV stock data from Alpha Vantage into BigQuery, processing 50K+ records/day.
- Enabled analytics dashboards and ML workflows by automating ingestion, schema validation, and anomaly detection.
- Designed Pub/Sub → Dataflow → BigQuery architecture with fault tolerance and monitoring, improving pipeline scalability and observability.

DeepDive: AI-Powered Tech Intelligence Platform | Next.js, FastAPI, FAISS, Redis, Docker, GCP

2025

- Designed and deployed a full-stack platform aggregating 70+ daily tech items from Twitter (X), Reddit, Hacker News, GitHub, and 30+ RSS feeds into a centralized AI-powered search system.
- Implemented semantic search with **FAISS vector DB** and **sentence-transformer embeddings (384-dim)** to deliver sub-second, context-aware results.
- Engineered ingestion + processing pipelines for multi-source data with deduplication, auto-tagging, and ML-based trending algorithm (popularity, recency, velocity).
- Built **Next.js** + **Tailwind** frontend with real-time updates, collections, watchlists, and Google OAuth authentication; deployed via Vercel with CI/CD.
- Optimized backend with **FastAPI (async)**, Redis caching, and Cloud Run autoscaling, supporting 100+ concurrent requests with structured logging and rate limiting.

LEADERSHIP & ACTIVITIES

Hacker Devils, ASU

Aug 2023 – Present

- Competed in coding competitions, placing in top 10% twice.
- Attended workshops on AI/ML, cloud, and algorithms.

AI Society, ASU

Aug 2024 – Present

- Worked in AI Maker Space building applications with peers.
- Learned ML fundamentals, NLP, and Retrieval-Augmented Generation (RAG).
